METADATA RECORD SHEET

PLOT INFORMATION:

PLOT IDENTIFIER: ______________________

NVS PLOT IDENTIFIER: (if applicable) ______________________

SURVEY: ______________________

REGION: ______________________

CATCHMENT: ______________________

SUB-CATCHMENT: ______________________

MEASURED BY: ______________________

RECORDED BY: ______________________

DAY/MONTH/YEAR: ______________________

TOPO. MAP NO. & NAME: ______________________

GPS Make & Model: ______________________

Easting: ______________________

Northing: ______________________

GPS FIX: Single / Averaged; 2D / 3D

GPS ACCURACY: 100% Y / N; ± __________ m

Datum: NZGD2000

TEAM INFORMATION:

Team leader: ______________________

Team members: ______________________

HAZARDS: ______________________

____

____

LAND TENURE OF PLOT: ______________________

PERMISSION CONTACTS:

For access to plot:

Name: ______________________

Address: ______________________

____

Phone number: ______________________

Mobile number: ______________________

Email: ______________________

Preferred method of contact by monitoring team: ______________________

Name of monitoring team contact person: ______________________

Planned access date: ______________________

Gate keys necessary: Yes / No

For access across land to plot:

Name: ______________________

Address: ______________________

____

Phone number: ______________________

Mobile number: ______________________

Email: ______________________

Preferred method of contact by monitoring team: ______________________

Name of monitoring team contact person: ______________________

Planned access date: ______________________

Gate keys necessary: Yes / No

IF PRIVATE LAND OWNER ONLY:

Owner restricts use of data outside the Lucas program? Yes / No

Owner requested copy of data? Yes / No

NOTES: (e.g. Difficulties with access to location): ______________________

____

TIME ALLOCATION (HH:MM)

Access:

Town/Area based for plot	climber load
Travel method / time	hh:mm
Drive time to plot / line start	07:20
Drive time to heli start	13:15
Fly time to plot	06:15
Boat time to plot	
Walk time to plot	
Search time to re-locate plot	
Alternate route used	Y / N

Vegetation plot:

Method	hh:mm	People
Plot layout:	229	148
Recce description (front)	88	195
Recce description (back)	05:20	230
Horizontal distances	17:00	178
Stem diameters / saplings		
Tree heights		
Coarse woody debris		
Understory plots		
External plot		
Time spent on a plot *		

Collections and nested RECCE's

Method	hh:mm	People
140		
Non-vascular samples collection	12	
Soil samples	166	barte ne eled
Recce back 2x2		
Recce back 5x5		
Recce back 10x10		

(*) *Note this is number of hours from start to finish to measure plot (e.g. Start at 8am and end at 2pm = 6hrs).*
