Save Our Streams

Stream Quality Survey

Date _____
Time _____
Name _____

Please refer to the Izaak Walton League's volunteer stream monitoring protocol and identification guides to learn how to complete this form. Please use the League's *Field Guide to Aquatic Macroinvertebrates* to complete portions of this stream quality survey form. For assistance, please call (800) BUG-IWLA or send an e-mail to sos@iwla.org.

Stream _____ Station # _____ County/City _____

Location _____

Weather Conditions (last 72 hours) _____

Water temperature _____ F°? C°? Avg. stream width _____ ft. Avg. stream depth _____ ft. Flow rate _____
(above or below average)

Rocky Bottom Sampling

Before sampling, record riffle composition on the back of this form. Take 3 samples in the same riffle area, fill out this form, and keep the highest scoring sample for your records. To help track the number of samples you have collected, check one of the boxes below:

☐ Sample 1 ☐ Sample 2 ☐ Sample 3 ☐ Is this your highest score sample?

Muddy Bottom Sampling

Record the total number scoops taken from each habitat type and provide details to best describe the specific habitat on the lines below.

☐ Steep bank/vegetated margin _____
☐ Woody debris with organic matter _____
☐ Rock/gravel/sand substrate _____
☐ Silty bottom with organic matter _____

Macroinvertebrate Count

Indicate if the macroinvertebrate species listed was in the video. Total the number of species in each category and multiply according to the correct category. For example, if you identified 3 species in the Less Sensitive category, multiply by 2. Then add together the three totals from each column for your stream's index value. Determine the overall water quality of the stream sample site based on your Total index value. E.g., if your Total index value is 13, the Water Quality Rating is Fair.

SENSITIVE	LESS SENSITIVE	TOLERANT
☐ Caddisflies (except net spinners) ☐ Mayflies ☐ Stoneflies ☐ Water snipe flies ☐ Riffle beetles ☐ Water pennies ☐ Gilled snails	☐ Dobsonflies ☐ Alderflies ☐ Fishflies ☐ Crayfish ☐ Common ☐ Scuds ☐ net spinning ☐ Aquatic ☐ Caddisflies sowbugs ☐ Crane flies ☐ Clams ☐ Damselflies ☐ Mussels ☐ Dragonflies	☐ Aquatic worms ☐ Black flies ☐ Midge flies ☐ Leeches ☐ Lunged snails
_____ # of letters multiplied by 3 = _____	_____ # of letters multiplied by 2 = _____	_____ # of letters multiplied by 1 = _____
Now add the three totals from each column for your stream's index value. Total index value = _____		

Compare the final index value to the following ranges of numbers to determine the water quality of the stream sample site.

Water Quality Rating

_____ Excellent (> 22) _____ Good (17-22) _____ Fair (11-16) _____ Poor (< 11)
